

Awards

ACM Contests	
<i>International Collegiate Programming Contest Regional</i>	
• Gold Medal, The 2023 ICPC Asia Hefei Regional Contest • Gold Medal, The 48th ICPC Asia Regional Contest Jinan Site 2023 • Gold Medal, 2023 China Collegiate Programming Contests, Shenzhen Site	
National Olympiad in Informatics (NOI)	2022
<i>Silver Medal</i>	
Irving T. Ho Fellowship	2025
<i>Only recipient in class</i>	
SJTU Class A Scholarship	2024
<i>Only recipient in class</i>	
Zhiyuan Honorary Scholarship	2023, 2024, 2025
<i>for the top 5% in SJTU</i>	

Selected Research Projects

Universal Adversarial Attacks on GUI Agents	June 2025 – Oct 2025
• Demonstrated that a single universal adversarial patch can hijack VLM-based GUI agents to execute harmful multi-step actions.	
DynAuditClaw	March 2026 – April 2026
• Open-sourced a dynamic security audit framework for OpenClaw agents that discovers vulnerabilities under real-world configurations. The framework leverages autonomous agents to design and execute targeted attacks, conducts secure testing within Docker environments, and generates comprehensive audit reports.	

Technical Skills

English Proficiency: TOEFL 112, CET-4 (635), CET-6 (613)
Programming Languages: C++, Python, LaTeX
